(Based on VPAT® Version 2.4)

Name of Product/Version: AMP (Level Access's Accessibility Management Platform)

Report Date: April 22, 2021

**Product Description:** The Accessibility Management Platform, or AMP, is your organizational command center, solving the complexity and challenges of enterprise-wide management so you can quickly and efficiently build, test, and maintain accessible systems. AMP's powerful testing engine and workflow, intelligent reporting, and accessible development best practices, allow organizations to build, test, and maintain accessible software quickly and efficiently.

Contact Information: info@levelaccess.com

**Notes:** Testing was performed on Microsoft Windows 10 PCs with Google Chrome and Firefox.

**Evaluation Methods Used:** Evaluation of AMP involved a combination of manual and functional testing. Level Access (Level) comprehensively tested a selection of pages representative of AMP using a testing methodology that is aligned with the Web Accessibility Conformance Evaluation Methodology 1.0. Assistive technology, including a screen reader (JAWS), screen magnification (ZoomText), and speech recognition (Dragon), was used along with exclusive use of the keyboard, manual inspection of code and review of Accessibility API output to determine support for the WCAG, Section 508, and EN 301549 criteria.
